

This information sheet is addition to the map on the conference website. The venue for the conference, 6 College Park, is located to the left of the McClay Library building, set back from the main entrance. You can access this from the library via College Park Avenue or alternatively off Rugby Road. Please be aware that the adjacent *David Bates Building – School of Mathematics and Physics* is currently under major refurbishment and so there will be a working construction area in place during your attendance, opposite the entrance to 6 College Park. You can still access the venue as usual but please be aware of the restricted mobility in place.

Please note the registration times for both days and arrive in plenty of time. The keynotes that follow will be held where the speaker presents adjacent to the room entrance and will be disturbed by late entrants. Attendees are kindly requested to ensure they adhere to conference timings as late arrival may not be permitted after sessions have started. We look forward to seeing you on the day.
